SEEDLINGS

These are grown here near Portland without irrigation, and are, we believe, much less likely to develop crown gall after planting than irrigated seedlings. Try them and be convinced.

We have not yet finished grading, but as near as we can judge at this time, we have some surplus in the grades named below.

We will also accept orders for a few French Pear in connection with orders for other seedlings, but contingent on our import orders being filled in full as booked, as we have assurance they will be.

| | Grade | Per 1000 |
